

Sample Script for Educating Patients About NEHII

We want to inform you that we are now sharing patient health information with NEHII. That means we are sending select patient information from our electronic medical records to NEHII and they make the information available to other authorized healthcare providers, their staff, and insurers outside of our office.

This helps other authorized doctors, specialists, medical staff and insurance companies who also participate in NEHII to quickly locate your information, such as lab or x-ray results. They can also quickly verify your insurance coverage or process your insurance claims.

Currently your health information is being shared by telephone, fax, mail, or through computer networks. NEHII makes the process of sharing your health information more efficient for your medical providers and staff. This can be critical, especially in an emergency situation where you may be in a different town or city. Your treating doctor could easily access your complete and accurate health record, so they can provide you the best care possible. There is no cost to you to have your information shared.

Because our office is now participating with NEHII, your information will automatically be shared with NEHII unless you wish to not have your information displayed.

If you do not want your health information displayed, we can help you complete the Opt-Out form. If you ever wish to Opt back in, your information and history will then be displayed for provider, authorized staff and insurers to view.
